

China Water filters faucet Manufacturer

Whole house of point of entry (POE) systems are typically installed on a home's main water line, trapping sediment before it enters the house water supply. Investing in a whole-house filter will help protect clothes, fixtures and toilets against unsightly stains caused by iron and rust particles. It will protect and extend the life of your appliances by removing sand, silt, scale and other particles.

Countertop water filters are fully assembled and packaged in attractive retail cartons, complete with installation instructions, Filter housings are rated for pressures to 100PSI and temperature to 125F. 3/8" chrome inlet fitting, 3/8" diverter valve White housings and white tubing are standard. Private labeling is available. with minimum order required.
